

## Wildlife Act Review

### Submission Comment 62:

Contributor: Individual

#### Primary interests:

- Protection and conservation of wildlife and habitat
- Management and control of wildlife causing problems or damage
- Protections for marine mammals

#### Comment

I would like to see stronger laws regarding the protection of native habitats and vegetation, and enforced stronger penalties for breaking these protections. I would like to see stronger laws protecting vulnerable and endangered species, and enforced stronger penalties to those who harm these species.

I would like to see programmes aiming for the complete eradication of foxes, deer, rabbits and other introduced wildlife that negatively impacts native wildlife. The maintenance of these species for hunting is not an acceptable wildlife management strategy. Hunting should be used purposefully to completely eradicate these damaging species.
