Comment

Stop the use of 1080. I can't believe the sense of poisoning where you eat & drink even if ya don't care about the horrific death it causes. No living thing should be exposed to this poison. People are traveling with their dogs now. Taking them for walks as they go on long road trips. How will you protect these families from 1080?

Also would like you to refer to dingos as dingos. They should be protected & managed properly. Looking at working with & supporting farmers with guardian animals smarter ways in moving livestock. Working on ways to create more of a partnership between farmer & dingo
