Comments: I'm writing to express my disapproval of the proposed Kalbar project. I live in the city and treasure going out into nature and enjoying a break from the fast paced lifestyle that I live. The proposed works make me incredibly worried about the future of our country's environmental health if it goes ahead. Australia is already seeing the devastating affects of climate change, and we need to prevent as much of these types of projects as possible. The impact on local farmers and residents would be devastating, when they are already experiencing the consequences of the recent drought. It makes no sense to go ahead with this other than for corporate gain, which is entirely irresponsible and in the face of the climate crisis, totally catastrophic.
