Comments: I wish you have considered the communication infrastructure on this urban renewal project. As you know, NBN right now is in charge of upgrading the phone and internet line, but NBN is not using FTTP as the new medium. If Fishermans Bend doesn't get FTTP, then the renewal project will only be half done. Also, to facilitate this, you might want to build conduit access to the side of the road or railroad, and you can lease it for electricity, water, communication, or other purposes.
