Comments: We are not opposed to the North East Link as such, but we are completely opposed to this project commandeering the centre reserve of the Eastern Freeway! That reserve has been set aside for decades for the eventual construction of a Doncaster Rail Line. That line is desperately needed now, and that need will only increase as Melbourne grows. Even if the current government can't afford it now, a future government definitely will be able to (the Melbourne Airport Rail Link is a perfect example of such a project finally coming to fruition after years to waiting). To prevent the Rail Link ever being built by allowing cars to take over the reservation is a false economy and a disaster for the environment. Sure, build the NE link, but don't take over our freeway reservation! Yours Sincerely, Malcolm & Rosemary Pryor.
