

Macedon Ranges Localised Planning Statement Submission

As a young voter living in the Macedon Ranges I believe the LPS doesn't provide the protection the Macedon Ranges needs heading into the future.

As a volunteer on several [REDACTED] I see the damage development does to the environment.

I believe statement of planning policy No. 8 remains the only planning document that can truly protect the Macedon Ranges. This should form the basis of any future planning policies. The recommendations of the Macedon Ranges Protection Advisory Committee should be adopted.
