I used to work for a company called [text redacted]. I did it as a contractor. But i felt like a employee.

They are based on the corner of [text redacted].

They were very demanding. They are a courier business. I had to maintain my own van. Pay for petrol and running costs. After costs i barely made a profit.

They would make you drive for 30 minutes to pick a \$5 job. If you said no, they would scream down the phone.

It was a very hostile environment to work in.

Thank you for doing this inquiry
