Comments: As a resident who lives in close proximity to the proposed North East Link I am completely opposed to it for a number of reasons including the impact to local businesses/jobs, increases in noise and air pollution, and destruction of large swathes of natural habitat. If it is determined that the NEL route must proceed on its proposed trajectory a compromise must be made with the local community who are going to be hugely impacted by this change. If a boring machine is being used it would be logical to tunnel right through to the M80 freeway instead of half way (known as the SMART Taxpayer Design - Save My Area's Residences and Trees). This would be a good compromise and certainly reduce the impact to the local community and environment.
