Macedon Ranges Localised Planning Statement

This is to register my objection to the draft LPS for the Macedon Ranges. My objections are based on;

The LPS provides actually no protection and puts at risk the integrity of the environment which is already significantly degraded. This LPS will result in further degradation.

Growth in urban settlement as per the LPS is completely appalling and will only put further strain on public transport, water and sewage systems and the actual integrity of these small towns. We do not want to end up like Sunbury.

Why cannot there be some really brave thinking – like establishment of more state parks and reserves, that would actually protect some of the unique flora and fauna of the region.

Yours sincerely,
