Comments: I do not believe the tram bridge is a good idea as it blocks boats from coming into the marina. I do not personally have a boat but i do enjoy going on walks and looking at the boats in the marina. Some of our neighbours have boats and this would effect them greatly. Also some boats are used as a tourism attraction. I myself am one for the animals this bridge would take away animals homes for a bridge that causes more problems than solutions. I was also made aware that my properties selling price may devalue. There are simply just too many negatives and not enough positives to having the bridge.
