

Gender Equality Bill

[Redacted] Submission

The *[redacted]* is pleased to support the Victorian State Government Gender Equality Bill.

We ask that intersectionality is kept at the forefront of the Bill, principles and actions. We believe explicit action and resources are needed to support the involvement and prioritising of women* at identity intersections - such as First Nations women, women of colour, recent arrivals, women with disabilities and LGBTQIA+ folk.

We also ask that all gender identities continue to be represented in this work and that language and actions are explicitly inclusive of genderqueer identities.

We support the use of quotas.

We look forward to supporting State Government leadership in this field.
