**Comments:** Please, for the sake of all Victorians, Stop Kalbar from mining in East Gippsland before it is too late! The East Gippsland area is a significant agricultural food bowl for Victorians. Kalbar's proposal to mine in Glenaladale greatly threatens our water supply, requiring far more water than is available and desperately needed by local farmers who supply Victoria and beyond with vegetables, dairy and beef. It will also introduce dangerous airborne toxic contaminants that threaten food safety and the local water supply. Kalbar, a company with overseas alliegences, has a shocking record of causing irreparable environmental damage in its previous projects in other countries. Meanwhile Kalbar has no experience in the type of mining proposed for Glenaladale East Gippsland. Please protect Victorians from Kalbar mining the currently pristine Genaladale environment situated right next to the Gippsland Lakes. Thank you, Jessie Ng
