

To Whom It May Concern:

As an irrigator in the Lower Murray Water Red Cliffs Pumped Irrigation District, I am writing to offer my submission to the DEWLP Deliver Share Review in Northern Victoria.

Given the very short time-line between the release of the relevant discussion papers and project report relating to this matter, I do not believe that true and proper consultation has been able to take place on this matter.

Consequently, I do not consider there is any need to alter in any way the Current Delivery Share Arrangements that apply in this region.

As such, I am NOT in favour of any changes being made to the current Delivery Share Rules, as they are working perfectly appropriately in their current form in this region, hence there is no need for any change.

Please accept this as my submission
