Comments: I operate a small construction and landscaping business. I drive a small 3t truck. The lane widths are acutely dangerous for us especially at the top of rosanna road before the convent. B doubles etc have no chance. As they approach the banyule rd intersection they must straddle both lanes or oncoming lanes. Then at the intersection there is a 5th turning lane. Sitting in that turning lane with approaching traffic is a catastrophic accident waiting to happen. People will die on this road as it continues to cater for unacceptable OD traffic along with the increased volume.
