Comments: I DO NOT SUPPORT THIS GOING AHEAD. It's a shame and a travesty to be putting the natural eco system in harms way for this. The \$155M/year Mitchell River Valley vegetable industry that employs up to 2,000 people is as close as 500m downwind from the mine. Will any farmers be able to sell their crops, meat or live stock if their produce is contaminated and they are known to be in a toxic mining area? The answer is most likely a NO. The Mitchell River, the source of water to irrigate those vegetables and make ice to transport them is 350m downwind (between the mine and the vegetable fields). Kalbar needs over 3 billion litres of water annually for processing and dust suppression for 15 years. This shows how much water is needed to control the dust which will potentially pose major human and animal health risks. I repeat. I do not support this!!!
