

Wildlife Act Review

Submission Comment 271:

Contributor: Individual

Primary interests:

- Protection and conservation of wildlife and habitat
- Wildlife welfare

Comment

Forest management including feral pest control and wildfire fuel load mitigation are essential. Timber harvesting is strictly controlled and provides essential services to the protection of wildlife and to the community at large. Manipulation of facts and outright deception by green groups have resulted in extremely poor outcomes for Victorian Wildlife, due to government policy being poorly thought out and providing loopholes for activist groups to undermine or reverse the intent of legislation. It is imperative that this review in no ways seeks to undermine the contribution that Industry makes to the protection of wildlife and their habitats.
