**Comments:** I'm writing as a concerned Australian and former Victorian resident. We cannot allow the continuous destruction of environmentally significant wetlands to make a quick profit. More so the potential for risk to human lives and livelihoods in the name of is unfathomable and abhorrent. Consider the lives of you're fellow Australians. Consider the cultural significance of this play to our indigenous brothers and sisters. Consider the future you want for you future generations. It is a biological imperative to survive. Survival is impossible on an uninhabitable planet.
