Comments: See attached submission. I find it unbelievable that anyone should contemplate decimating the pristine haven of our Lindenow Valley. Have any of you actually been there and experienced that placid feeling... the quietude... the delicious earthy fragrance... the taste of the seasons soaking into you? Yes. You've obviously visited and collected a sample of the ore you so desperately want. But you seem to be afraid to say what your analysis actually found in case someone dares to ask questions. I have a friend who is currently dealing with the devastation of lung disease due to substance exposure. It is inconceivable that your company would consider contaminating our air for the almighty dollar. And you seem to think you have the right to forcibly take away people's land. Some may have even been in their family for generations. Some may be a family's dream of a new start in a fresh country landscape. We retired to this beautiful area for its peace and quiet away from the hustle and bustle of Melbourne. Please don't take away our tranquility.
