Comments: I think at this point in the game it should be 110 percent clear why I and so many other locals are making these submissions. The only thing driving the mine is money and you can't eat money. You can eat almost everything that is being grown below the mine site, and eating said growth gives money back to our local farmers and workers. There is nothing good to come from this mine. Don't do it. Just ██████ don't.
