**Affected property:**

**Attachment 1:**

**Attachment 2:**

**Attachment 3:**

**Comments:** The destruction of local flora and fauna is a devastating loss for east Gippsland and all to line the pockets of a few. Enough with the rape and pillage of the land we need to look for sustainable ways to support our communities that are not at the detriment of the land we live on. The seepage into the lake system will have devastating consequences destroying the very feature we are known for. It breaks my heart that this mine is even being considered please enough. Protect our environment
