Comments: To whom it may concern The fact that this mine has even been aloud to progress this far is a testament to how money hungry those that allow it actually are. It is a total disregard to the people that actually live, and work in the area and will destroy east Gippsland. I'm not anti mining but only a fool would see this is a good idea. If it was proposed to be located in Melbourne CBD do you think it would be approved? Why do those that live in direct proximity not matter?
