Comments: I am opposed to the mine at the Fingerboards in East Gippsland. I have huge concerns regarding the amount of water usage and potential for contamination. The farming land that rely on the Mitchell river, the animals and the environment and the inflow to the Gippsland lakes is too much to risk the slightest upset. There is also significant aboriginal history that will be destroyed. I am also concerned as Kalbar acting as a shell company and selling their rights to another company as they previously done. NO MINES
