**Comments:** I live on the Gippsland Lakes and have done so my entire 32 years. They provide me with a job, exercise, pleasure, community, food, recreation and a biodiverse environment. All of that is under threat, not to mention the immeasurable cultural heritage of both the Lakes and the Fingerboards area. The fact that we keep threatening and destroying our unique living resources for the sake of consumerism and capitalism is utterly shameful. Please make the right choice.
