

Hello,

I agree with and fully support the SPP. The one area of concern with Ocean Grove (OG) I have is lack of primary school places currently available and believe that this would only become more of an issue as more housing is built in the proposed areas within Ocean Grove.

Our children attend Star of the Sea in Ocean Grove and we have noticed a significant increase in traffic around the schools in the past 2 years and I have personally witnessed several near misses. Star of the Sea has recently built more classrooms and a new gym/hall to accommodate more pupils, and Surfside Primary has a grant to develop their school. These developments, although necessary to accommodate more children and improve facilities, do take away the extremely important natural outdoor space from the pupils.

These primary schools are at tipping point, and I would suggest consideration be made for another primary school to service the current population and future population of Ocean Grove.

Kind regards
