<b>How do you think we should improve the FFG Act?</b>	<p>We all have to realize that once the threaten species are gone, they are gone forever.</p> <p>Maybe there should be some school programs teaching children from a very young age not only about our fauna and flora but also how to take care of it. It's very frustrating to see the natural habitats shrinking (all around the world) due to human greed and ignorance. It is also sad to see the land and oceans polluted with plastic and all sorts of rubbish. Governments have the power to legislate and improve situations for all creatures. Let's not waste the chances before too late.</p>
