

Rates are based on a persons propensity to pay ( fairness and equity ) in as much as the more opulent the house the more rates are paid.

With Farming the land is a tool of the trade to produce food and fibre that is a necessity to all.

The propensity to pay is different as the value of the land in real estate terms does not reflect the fact that cattle need to graze it what ever it costs, and cannot be expected to graze less as prices of real estate go up.

EXEMPTIONS APPLY:

Crown Land, government more than able to pay its fair share is exempted.

All people bar farmers enjoy a regular fair income for a regular days work.

CHARGE FARMERS RATES FOR THEIR HOUSE BLOCK, NOT THEIR TOOLS OF TRADE!
