**Comments:** My home is in the direct wind path of the mineral sands mine. Our wind is strong because it comes across the open paddocks from Lindenow. I don't want property prices to diminish due to health concerns from particulate matter. I do not want my washing to be covered in dust. I do not want water wasted on hosing down the substrate to stop the dust from coming across. The land may belong to the mine, but the water and the minerals belong to everybody. It is time that companies stop trying to take what belongs to all of us. The people of the area want it to stay in the ground. The environment is one of the main concerns of our young population, and companies are still trying to create new mines. It was okay when our forefathers didn't know any better. Now that we do know... it is unforgivable. I am the parent of teens and as an active voter it is my job to advocate for them. We all say no.
