wish to continue the current process - of applying to minimally cull excess kangaroos on our farm that jeopardize our livelihood. Happy to apply annually. Deer Problem - feral deer are another matter - they need government culling programs - in the Yarra Valley the deer breed easily and destroy our farm's bushland. The deer's hooves are destroying our beautiful rare orchids within our 10 acre pristine block. As an introduced species, no true Australian should have any regard for this invasion. Whole-heartedly recommend continued official government deer culling. The meat is beautiful and one wonders in times of poverty, why some enterprising businesses can't be allowed to prosper on this resource... even if it might be short-term? Our farm is on the edge of National Park but it is not fenced to prevent deer - they break the existing fences thereby allowing access from the National Park into our farmland - could we get deer-proof fences?
