**Comments:** Thank you for the opportunity to provide a submission. It is my view that the decisions made on the Bulleen precinct land use enable solutions to the open space issues created by the North East Link project. This includes ensuring that the Framework Plan supports opportunities for active recreation in the Bulleen corridor for current and future sporting communities, for the land between the Eastern Fwy and Finns Reserve. There should be a major focus in this precinct on active recreation and supporting infrastructure, to offset the disadvantages to the Bulleen community from the North East Link. Regards, Matt Maguire
