Comments: Hi As a resident of Garden City living directly opposite Wirraway, my feedback on latest vision for the precinct is; * General comment - most people in area I speak to about this project aren't NIMBYs. We recognise if done right this will be of benefit to us, however we're also acutely aware the opposite also applies. So we're trusting it will be done right for the community -not what suits developers -with sufficient investment. * Relating to first comment above - If we're serious about public transport, the CoPP is correct, the Plummer St tram must be done within 4 years, not up to 10 years away as per current timeline. This commitment should be made, lest this tram line go the way of the Doncaster Rail, Waverley Park Rail, Airport Rail etc and never happen. Commit now, as otherwise we risk it never being done and yet the area is still flooded with up to 24-storey apartment blocks with insufficient public transport. * Integration of Garden City to Wirraway. Given there is no pedestrian lights from Graham St to Todd Rd, how are people, especially children & elderly meant to travel between the two areas? I didn't see anywhere in the reports speaking about this integration & ensuring safety. Surely there needs to be pedestrian crossings added on Williamstown Rd for safety purposes to facilitate safe travel? As instead of driving to Bay St Coles, we can walk to Wirraway Supermarket, but how am I getting the kids across the road safely? * I read plenty of pages about managing transport, but to the layman, still to be convinced that the redevelopment can work with the expansion of Webb Dock. The two clash, and all the corporate speak doesn't give me confidence. We need more details, not motherhood statements. * Perhaps more for CoPP, but how does the family friendly nature of Wirraway tie in with the booze hall that has been put forward as noted in The Age last year? thanks Damien
