Comment

As a human being, I am utterly dismayed at the treatment of kangaroos in this country. The processes in which these sentient creatures are treated with are barbaric and psychopathic. The disconnect and lack of care shown towards these animals, that have every right to inhabit our country, is extremely disheartening and the government needs to act to change attitudes and processes, now. When I see what is happening to these creatures, I am ashamed to be human. So should everybody else.
