**Comments:** I absolutely object to the closing of Avon Street and leaving Austin Street open for traffic coming off Manningham road, cutting through York St to Austin Street onto Bulleen Road to access the interchange at Avon Street. This will increase traffic through Austin Street by 10 fold due to increased traffic turning left from Manningham Road onto Bulleen Road to access the interchange at Avon Street. Both Avon Street and Austin Street already experience increased traffic cutting through from Manningham Road to Bulleen Road during peak hours so obviously with the new interchange at Avon Street this traffic will increase. As you are making it inconvenient for the residents in these 2 streets by restricting entry/exit into Avon and Austin, I would prefer you closed off both Avon And Austin at Bulleen Road to stop the flow of traffic cutting through. Ideally the interchange should be off Manningham Road veering left into the parkland and not interfering with residence or businesses but God forbid we knock down a tree or relocate some wildlife. I have spoken to all my neighbours and not one agrees with the proposal put to us, so If 100% of the residents who submit this form rejecting the proposal we should take it for granted you will not go ahead with it and we never hear about it again, or are you just going through formalities regardless.
