

■■■■■ submission to Engage Victoria Bellarine Peninsula

I think the draft Bellarine Peninsula SPP Vision should be amended to include the following:

1. Bonnyvale Wetlands should be mentioned in page 36 in section Environment and Biodiversity.
2. A Biolink or corridor should be planned for between Lake Begola to Bonnyvale Wetlands and on to Lake Victoria and added to Map 6. The farm currently in between is flooded a lot of the time, and is a marshland, which should be re-acquired and converted into a wetland link for the benefit of orange bellied parrots and other wildlife.
3. I do not agree that the land surrounding Lake Victoria in Map 7 and objective 6b7 is designated of extractive industry interest. I think there should be an area surrounding this important lake that is acquired and left for wildlife (and linked through to Bonnyvale Wetlands and the coastal foreshore).
4. Planning should be put in place on Map 8 for a trail for walkers and cyclists along the back of the foreshore from Pathway 5W through to Lake Victoria and beyond for people to appreciate wildlife.

Thank you for considering my submission

Regards
