Fingerboards Mineral Sands Project Inquiry and Advisory
Committee - EES

609

Request to be heard?: No

Full Name: Robyn Weeding

Organisation:

Affected property:

Attachment 1:

Attachment 2:

Attachment 3:

Comments: "Wildlife values within the activity area are high, with Nationally, State and Regionally protected species of flora and fauna, and vegetation communities. Around 788 mature hollow-bearing trees which provide critical habitat for an array of species including large forest owls, other birds, bats and gliders will be destroyed. Loss of hollow-bearing trees is a serious issue in Australia due to land clearing and logging - they are disappearing from the landscape and can't be replaced because hollows take upwards of 120 years to form."
