

The MDBA plan addresses the big picture of delivering huge quantities of water for environmental flows. A significant percentage of that water is to be delivered via the Goulburn River.

We are more concerned with our own big picture. We live in Molesworth.

Molesworth is regularly referred to, at meetings we have attended, as a 'Choke'.

The issue that we want to address as part of the MDBA plan is the safety of our home and our property from flooding by the MDBA plan.

We want reassurance from relevant agencies that our property and our home will in no way be affected by the MDBA plan.

If our property and our home is at any time flooded as a result of the MDBA plan, where will we stand?

Will full financial restitution be given to us?

Will our property still retain its market value?

Will there be a market rate buy back of our property by the MDBA and Governments involved?

We would like, as a matter of fact we insist, that our very real scepticism and fears be addressed to us personally.

Your sincerely

Andrew and Jillienne Russel
