Comments: My Name is Gary Williams I am a resident of at Yarra's Edge I understand but cannot believe that the fisherman's bend draft framework proposes a tram bridge over the Yarra river at YE I am opposed to this option for the following reasons: Loss of my current and retirement lifestyle Loss of value to my property Noise and pollution Loss of community Litigation based on all the above There are options available - albeit that the current planning team don't support, that are: Less impacting Easier to do I cannot believe that anyone would believe it is a good idea to ruin what Yarra point harbour has achieved, a great area for both the community and Melbourne's reputation and a residential friendly and safe place to live It is a great and peaceful place why are you planning on ruining it, please involve thinking, problem solving people to find a better solution For these reasons, I very strongly advise the Fisherman's Bend Planning Review Panel to recommend that the draft planning scheme amendment GC81 be opposed and to seek a more appropriate option to the transport needs and council needs for revenue from the fisherman's point project I propose planning an agile workshop, including people from the community, council, private and public sector which believe would come up with a better proposal Thanks for the opportunity to respond and please understand that I am totally blown away that anyone would believe it would be a good option to close the YP harbour and boating community (please note I have no boat) Regards Gary Williams
