Comments: If the Government goes ahead with the planned North East Link Project with its current location and planned pathway it will affect our business immensely as we will be forced to re locate along with 100+ other businesses currently in the same position. We will be all looking for a spot in the local area where we have all been running our businesses over many years to continue with our loyal customers. If we are forced out in other areas we will be forced to re build our business from the bottom up after years of hardwork and this will be devastating to not only ourselves as business owners but the workers that we currently have as our business through numerous owners has been in the local area for over 50 years and is well known. Loss of income, loss of clientele, loss of steady flow of work, struggling to pay our day to day expenses. It will not only be a business loss to us but also our landlord who will no longer have the rental income from our business. We will be put in further financial ruin if we have to build a new premises on land that will need to be sought out by ourselves (and others fighting for a spot) while trying to rebuild our business in a new location and not in an area that has multiple versions of the same business. Although we understand that this needs to happen, surely there is land that can be used to create another pathway that has less impact on so many businesses and family homes. Please consider that there are many of us that have been on Manningham Road in Bulleen for many years and it doesn't take 5minutes to build up such a loyal clientele. Although it will happen in stages and you are going to tell us it wont affect us in the start, we will be covered in by construction zones and our business will be hidden to the public eye which will also impact our earnings etc.
