Attachment 3:

Comments: Mining sand for export overseas at the expense of this beautiful river, the farms and the animals that need it is irresponsible and unnecessary. I want to speak up for the environment because my family has enjoyed hiking and camping in that region for decades. I want to speak up for the towns that rely on tourism to the region - towns that have already been hit hard by bushfire and distance. This mine will get out of hand as they always do. It will change the character of the entire region, destroy this precious river and only benefit a few greedy people in the process. They can look elsewhere for their sand mine.
