

### **13.03-1L Flood management**

--/--

#### **Proposed C269yara Objective**

To reduce flood risk through the appropriate siting of development and use of flood resistance measures.

#### **Strategies**

- Require development to be sited appropriately and include floor levels consistent with an assessment of 1 in 100 year flood depths and overland water flow paths.
- Require new developments to incorporate any necessary flood resistance measures.
- Require that flood resistance measures are maintained for the lifetime of the building.
- Protect and enhance overland flow paths.
