

Work Notice

Construction work - new power cable

Where	Milton Street between Colombo Street and Selwyn Street
When	6 October - mid November 2025
Why	To install a new power cable

29 September 2025

What we’re doing

Between 6 October – mid-November, we’ll install a new power cable along Milton Street through cable ducts we installed earlier this year.

We thread the new cable through the ducts using a winch. In preparation to pull the cable through, we need to open small sections of trench in the road along Milton Street. Both lanes of traffic on Milton Street will be open while we do this work.

Where we’re working

KEY

Previously installed cable ducts

Cable joint bay

Work area

Traffic management

- Both lanes on Milton Street will be open.
- From 20 – 24 October stop/go traffic management will be in place at night at the Milton Street and Selwyn Street intersection.
- On street parking will be reduced.
- Selwyn Street will be open.
- At times cyclists may need to merge with traffic.
- Some bus stops may be temporarily relocated.

Please follow all signs and instructions from our crew.

Delivering the new cable

From 20–24 October, we’ll be working at night between 7pm–12am to deliver the new power cable at the Milton St/Selwyn St intersection.

There are three drums of cable, and we unload one drum a night. Each delivery usually takes about 3–4 hours. We then pull the cable through the ducts during the day.

Joining the cable

Once the new cable is pulled through the cable ducts, we will join the pieces of cable together at a joint bay located at the corner of Selwyn Street and Milton Street. Joining the cable takes around two weeks.

While we work two containers will be placed next to the joint bay. Once we have joined the cables, we close the joint bay and reinstate the road surface.

You can contact the onsite Isaac Construction team on 027 406 2465.
