

Work Notice

Construction work - new power cable

Where	Hendersons Road and Sparks Road intersection
When	From 25 September - early October 2025
Why	Road closure to install cable ducts across the intersection

Date: 17 September 2025

What we're doing

As part of our work to install a new underground power cable, we'll be installing cable ducts across the intersection of Hendersons Road and Sparks Road.

From 25 September to early October, Hendersons Road (north of Sparks Road) will be closed. The exact start date is dependent on completing work at the Hoon Hay Road intersection, so the closure may begin any time from 25 September.

Before this work starts, we will reopen the Hoon Hay Road intersection. Sparks Road will remain one-way, from Hendersons Road to Hoon Hay Road.

Once we have completed work at the Hendersons Road intersection, we will reopen Sparks Road between Hendersons Road and Hoon Hay Road.

Traffic management

To do this work safely traffic management will be in place.

- **A road closure will be in place at Hendersons Road north of Sparks Road.**
- Sparks Road will be one-way travelling from Hendersons Road to Hoon Hay Road.
- Detour routes will be adjusted during this closure and signposted.
- Traffic travelling north on Hendersons Road can turn right and left on to Sparks Road.
- Crossing points for pedestrians and cyclists will be in place.

We appreciate your patience while we complete this work. Please follow all signs and instructions from our crew.

Where we're working

KEY

- Traffic flow
- Cable duct to be installed
- Road closure at Hendersons Road

Upcoming work

Once we have completed work at the Hendersons Road intersection, we will reopen both lanes of traffic on Sparks Road between Hendersons Road and Hoon Hay Road.

We will then start work to install cable ducts on Sparks Road between the Halswell Zone Substation and Hendersons Road. To do this work, a one-way system will be in place.

Cyclist access

Provisions for cyclists will be in place past the work site. Please follow all signs and instructions from our crew.

Pedestrian access

Pedestrian crossing points will be signposted. Please follow all signs and instructions from our crew.

How we install the cable

The new power cables will be pulled through the ducts we're installing. Once the ducts are in place, we will reinstate the road surface and reopen the road.

We will come back and thread the cable through the ducts and join the cable together at joint bays. Traffic management will be in place when we come back to pull and join the cable.

Installing ducts allows us to speed up the cable laying process.

Hours of work

The crew will generally work during the day between the hours of 7am - 6pm, Monday - Friday. However, we may need to do early morning or weekend work at times.
