---

We are writing to inform you that construction work is planned to upgrade the entrance to the intersection of Othello Drive and Rolleston Drive.

Isaac Construction Limited will carry out the work, which forms part of the Rolleston Drive/Tennyson Street intersection upgrade project.

For these works to take place a one-way system will be installed each day from 9am on Othello Drive between Kinglear Drive and the Rolleston Drive entrance next to the Rolleston Community Centre. This means only traffic coming off Rolleston Drive onto Othello Drive will be permitted. Road users needing to access Rolleston Drive from Othello Drive will need to detour via Kinglear Drive.

The work should take approximately one-week to complete (weather permitting) with the one-way system being installed on a daily basis from 9am-6pm as required.

The work itself involves extending the current island entrance to Othello drive and installing a safer pedestrian walkway across the intersection.

A general layout plan for the one-way system is included below.

You can also find online project updates at: <https://isaac.co.nz/projects/ongoing>.

If you have any questions or concerns, or would like the opportunity to meet to discuss the details of this project, please contact Pete Chum on [pchum@isaac.co.nz](mailto:pchum@isaac.co.nz) (03)3599199

Thank you for your patience whilst we conduct this work.

Isaac Construction
