

Work Notice

Construction work update

Where	Sparks Road between Hendersons Road and Lyttelton Street
When	New end date: late September 2025
Why	To install a new underground power cable

18 August 2025

What we’re doing

We’re currently installing a new underground power cable along Sparks Road between Hendersons Road and Lyttelton Street.

We’re bringing forward work to install cable ducts on Sparks Road at the Hendersons Road end. This will reduce the overall time we’ll be working in the area.

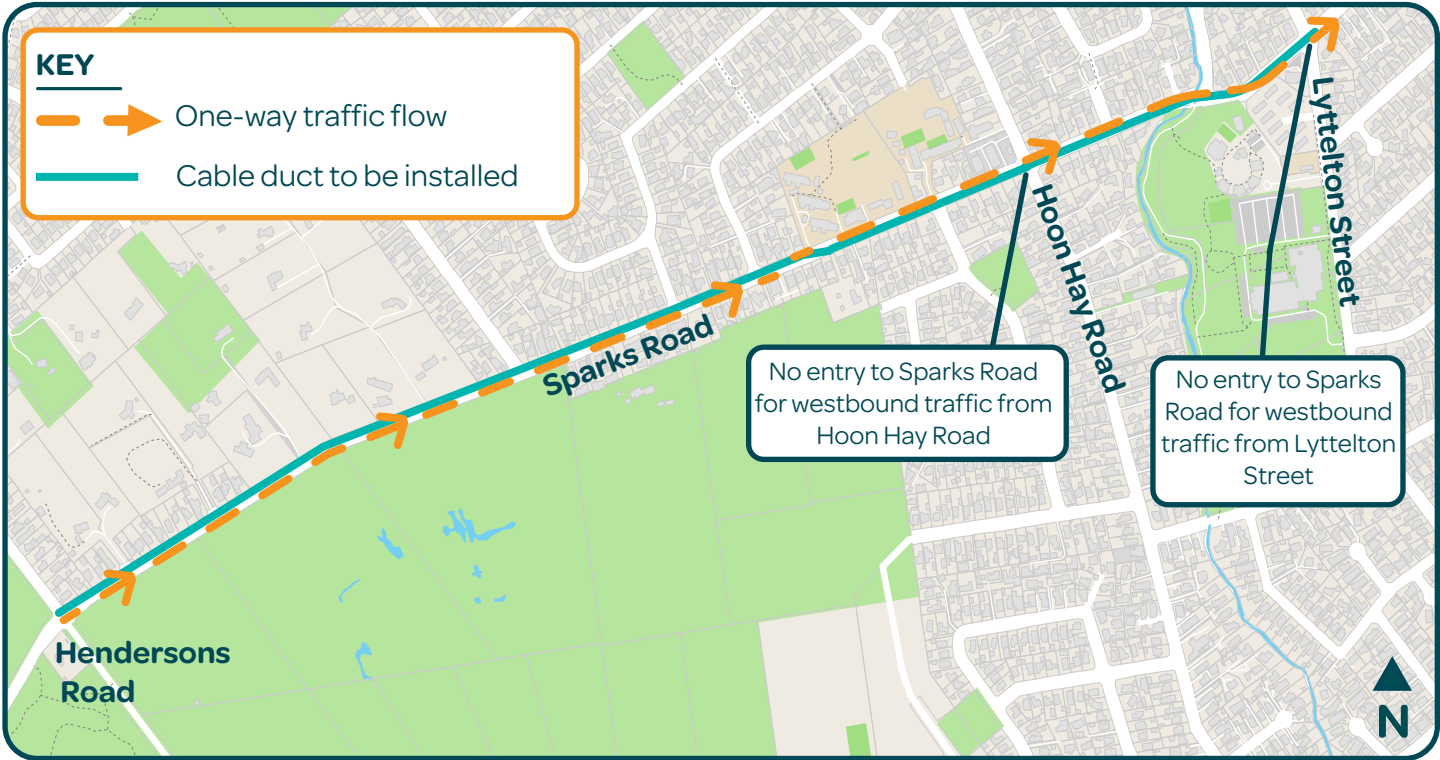

This means the one-way system on Sparks Road between Hendersons Road and Lyttelton Street will be in place until late-September.

Traffic management

- Sparks Road will be one-way travelling from Hendersons Road to Lyttelton Street until late-September.
- No entry to Sparks Road for westbound traffic at Hoon Hay Road and Lyttelton Street.
- Detour routes will be signposted.
- On-street parking will not be available.
- Pedestrian crossing points will be in place.
- Please follow all signs and instructions from our crew.

Bringing this work forward reduces the total time traffic management will be needed along Sparks Road. We appreciate your patience and understanding as we complete these essential upgrades.

Where we’re working

Property access

During the day, vehicle access to properties and streets on the side of the road where we're working will be temporarily restricted while we trench past.

We will place steel plates over the trench so you can access your property when we're not working.

We're keen to understand if you have any specific access needs.

If your driveway access has been impacted and you need to get in or out of your property contact Isaac Construction on 027 406 2465 or speak to a team member on site.

Rubbish collection

Please put your bins out before 6am on collection days. The crew will move and return them back outside your property if needed.

Bus stops

The bus stop outside 63 Sparks Road will remain open. The bus stops outside 25 and 50 Sparks Road will be closed.

Footpaths

Footpaths past the work area will be maintained. Pedestrian crossing points may be in place at crossings. Please follow all signs and instructions from our crew.

Cycleway

We're installing the cable ducts in the road. At times provisions for cyclist safety may be in place along the cycleway.

Upcoming work

There will be work coming up at the intersection of Hoon Hay Road and Sparks Road to install cable ducts across the road. This will require additional traffic management. This work will be completed around mid-September.

We'll let the community know more about this work closer to the time. All work is subject to ground conditions.

Hours of work

The crew will generally work during the day between 7am - 6pm, Monday - Friday. We may need to do early morning or weekend work at times.
