

Work Notice

Construction work - new power cable

Orion

Where Sparks Road between Hendersons Road and Lyttelton Street

When 7 - 22 August 2025

Why To install a new underground power cable

Date: 30 July 2025

What we're doing

We're installing a new underground power cable between the Milton Substation and the Halswell Substation on Sparks Road to strengthen our electricity network.

We've completed installing cable ducts on Milton Street and we're nearly finished work on Frankleigh Street. We now need to install cable ducts on Sparks Road and across the Heathcote River.

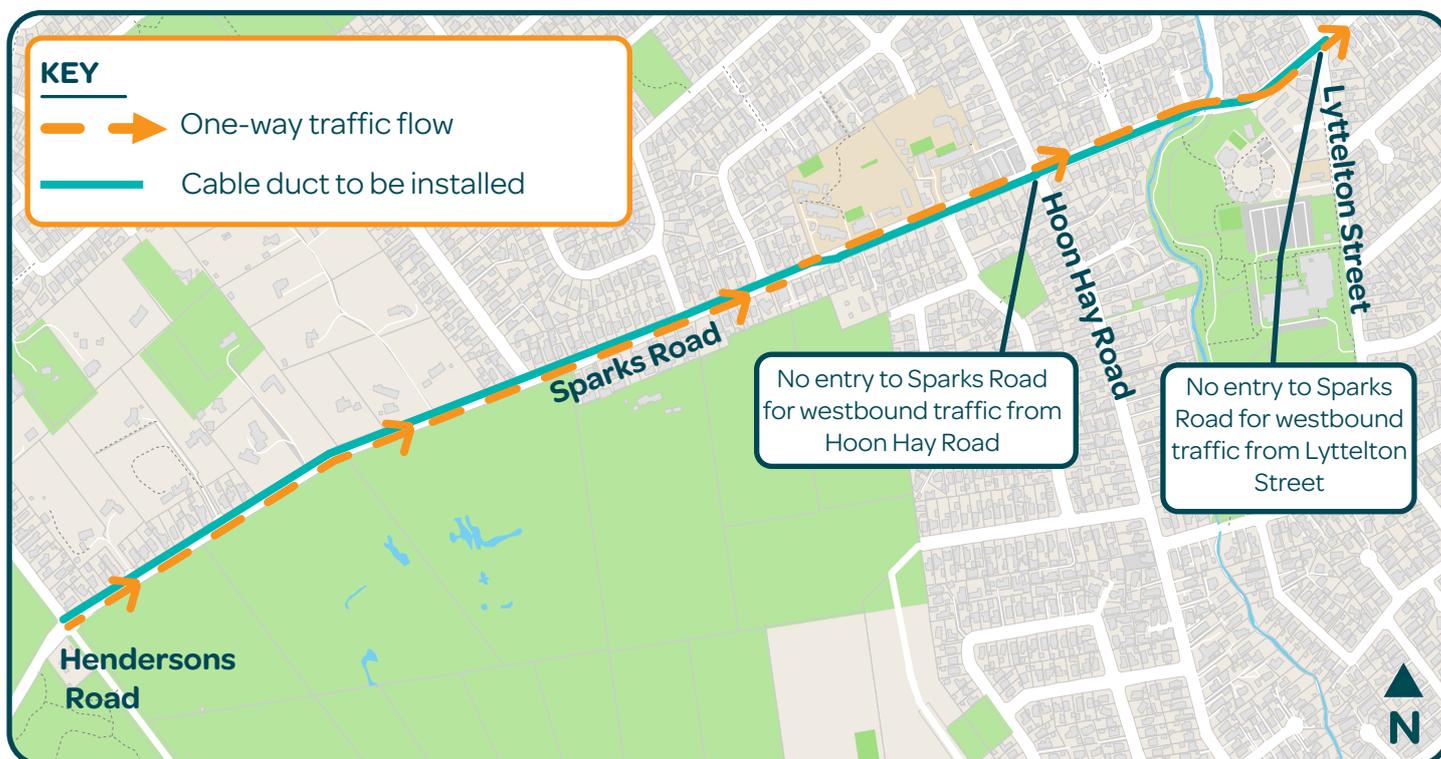

One crew will install ducts across the Heathcote River while another crew continues work along Sparks Road. Once we've crossed the river, we'll reopen Sparks Road between Hendersons and Hoon Hay Road to two-way traffic.

Where we're working

Traffic management

- Sparks Road will be one-way travelling from Hendersons Road to Lyttelton Street.
- No entry to Sparks Road for westbound traffic at Hoon Hay Road and Lyttelton Street.
- Detour routes will be signposted.
- On-street parking will not be available where we're working.
- Pedestrian crossing points will be in place.
- Please follow all signs and instructions from our crew.

This work won't start until we have reopened the Lyttelton Street intersection and completed current works. We understand this work is disruptive and appreciate your patience.

Property access

During the day, vehicle access to properties and streets on the side of the road where we're working will be temporarily restricted while we trench past.

We will place steel plates over the trench so you can access your property when we're not working.

We're keen to understand if you have any specific access needs.

If your driveway access has been impacted and you need to get in or out of your property contact Isaac Construction on 027 406 2465 or speak to a team member on site.

Rubbish collection

Please put your bins out before 6am on collection days. The crew will move and return them back outside your property if needed.

Bus stops

The bus stop outside 63 Sparks Road will remain open. The bus stops outside 25 and 50 Sparks Road will be closed.

Footpaths

Footpaths past the work area will be maintained. Pedestrian crossing points may be in place at crossings. Please follow all signs and instructions from our crew.

You can contact the onsite Isaac Construction team on 027 406 2465 or 66kvmiltontohalswell@isaac.co.nz.

Cycleway

We're installing the cable ducts in the road. At times provisions for cyclist safety may be in place along the cycleway.

Upcoming work

In early September we'll install cable ducts across the intersection of Hoon Hay Road and Sparks Road. This will require additional traffic management involving a partial road closure. We'll let the community know more about this work closer to the time.

In September we'll also finish installing cable ducts on Sparks Road between Hendersons Road and Hoon Hay Road.

Hours of work

The crew will generally work during the day between 7am - 6pm, Monday - Friday. We may need to do early morning or weekend work at times.
