I need to give a wee (urine) sample

1

My doctor/nurse has told me that they need a sample of my wee (urine).

2

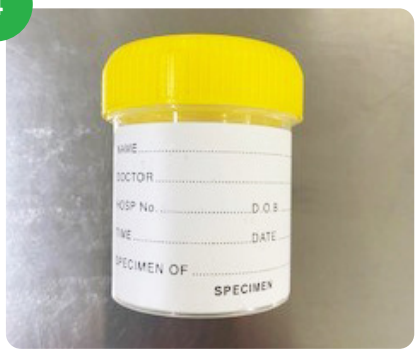

I will need to go to the toilet with my parent/carer who will be able to help with this job.

3

Before I start, I need to wipe so everything is clean. My parent/carer can help if this is tricky.

4

Now I need to start my wee. My parent/carer will need to be ready with a small pot to catch some of my wee for the sample.

5

The first bit of my wee will go straight into the toilet bowl, then my parent/carer will move the pot underneath to catch the next bit.

6

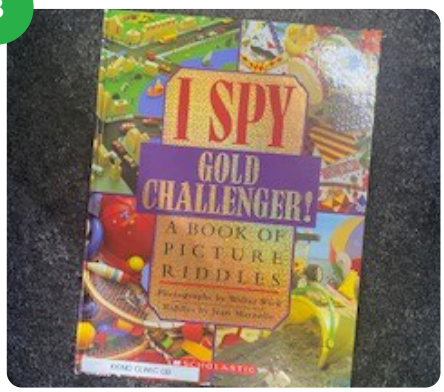

Once the pot has enough wee in it, my parent/carer will put the lid on while I finish on the toilet.

7

Once I am finished on the toilet, I will wash my hands before returning to the Emergency Department.

8

Now that the job is finished, I can do an activity to keep myself busy while I wait for my doctor/nurse.
