Eames® Molded Plywood Folding Screen

SLENDER BEAUTY

As Charles and Ray Eames saw it, designers just want to have “serious fun.” This undulating screen resulted from their play. Noting that U-shaped cross sections of plywood from their early molding experiments were stable enough to stand alone, they made them longer (68 inches) and joined them with canvas hinges and a synthetic adhesive developed during World War II. Today, a durable woven polypropylene mesh held securely by a new process ensures a longer life without compromising the integrity of the 1946 design. You get a portable, foldable, enjoyable way to divide space and give privacy.

Charles and Ray Eames

FIVE-PLY CONSTRUCTION

Sandwiching the screen's inner plies between light ash, walnut, natural cherry, or ebony veneers yields molded plywood sections that resist warping and separation.

SIX PLYWOOD SECTIONS

Woven polypropylene mesh connects six plywood sections, which unfold to a width of 60 inches.

Depth: 2¼"
Width: 60"
Height: 68"

Molded Plywood Folding Screen

WARRANTY

The Eames molded plywood folding screen is covered by the Herman Miller warranty for one year.
