

A close-up photograph of a wooden table top and its white plastic legs. The wood has a natural grain pattern. The legs are made of a smooth, white plastic material with a modern, curved design. The background is a plain, light-colored surface.

Pony

Pony is inspired by the quintessential picnic table and its inventive fusion of table and chair. A hybrid piece that combines a casual, fun attitude with supreme functionality, Pony is a welcome addition to educational, hospitality and office environments. Functioning well as either a stand-alone piece or grouped together, Pony is a true showstopper.

Pony
