

## Cluster Stools

2017

Some of the most innovative, powerful design takes its strength from its sculptural elements. In certain cases it is a sense of fragility that offers impact. At other times it is the imposing, muscular heft of the object that strikes a chord: A strong sense of presence. The BassamFellows Cluster Stool is a simple, easy to move object for sitting on, and it stacks neatly away without the need to be hidden. A group of Clusters looks "on purpose," and pleasing to the eye. It belongs to a canon of utilitarian, Modernist stools and looks like the kind of ultra-functional object you may find in a Japanese onsen – a design that may have existed unchanged for centuries. It is stark, but the dip in the seat and the rounded taper of its four legs is elegant and sculptural.

### CB-122 Cluster Stool
