Multilayered plywood inner frame; seat support with a combination of foam, memory foam, and a down and feather topper; arm and back cushions in foam with a down and feather surround. Solid Walnut blade legs.

Design 2014

ASYMMETRIC SOFA SERIES

The supremely comfortable BassamFellows Asymmetric Sofa is a stylish, scalable sofa that consists of three different lengths of sofa units: a corner unit, a chaise, and an ottoman. The planning module allows for a multitude of layout arrangements from a typical sofa format to landscape configurations where armed, armless, and backless elements can be combined to vary the horizon line of the piece and open it up to the room.

The sofa accentuates the horizontal with one large cushion for the seat and super thin arm panels that hold wide, comfortable arm cushions that double as head pillows when reclining. The seat is comprised of individually quilted, 8-inch square mini pillows. Blade-like, solid wood legs seem to virtually disappear. The comfortable sit has been achieved from the feather and down topper layer, together with three layers of foam in varying densities, including gel foam found in high quality mattresses.
