JAR RGB COLLECTION

DESIGNER: Arik Levy

YEAR OF DESIGN: 2013

MATERIAL: Hand Blown Bohemian Crystal Glass

Jar RGB is a lighting project connecting thin colorful glass blowing techniques and the idea of RGB color mixing. Using white glass for one of the hanging jars allows it to turn into a large light bulb generating the light for the entire fixture. Observing one jar through another and the space surrounding them gives one a unique and everlasting discovery of color superimposition.
